DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 30 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 33 and 30, when the talc or beads comprises 50%, the mixture adds up to more than 100%.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-5, 7-12, 14-16, 19-22 and 31-33 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 and 21-27 of copending Application No. 10/196264. Although the

Art Unit: 1712

conflicting claims are not identical, they are not patentably distinct from each other because although the claims of 10/196264 may differ in specifically teaching the use of both a glycol and oil, such is within the scope of the colloid and carrier of the present claims, and would render such claims obvious to one of ordinary skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 1-5, 7-12,14-16,19-23, 25, 26 and 29-33 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 and 37, 38 and 40-48 of copending Application No. 10/196266 (now allowed). Although the conflicting claims are not identical, they are not patentably distinct from each other because although the claims of 10/196266 may differ in specifically teaching both a glycol and oil, such is within the scope of the colloid and carrier of the present claims, and would render such claims obvious to one of ordinary skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Claims 1-5, 7-12,14-16,19-23, 25, 26 and 29-33 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5, 7-19, 21-22, 24-36 and 38-46 of copending Application No. 10/196265 (now allowed). Although the conflicting claims are not identical, they are

Art Unit: 1712

not patentably distinct from each other because although the claims of 10/196265 may differ in teaching extra additives, such claims comprise the scope of the colloid and carrier of the present claims, and would render such claims obvious to one of ordinary skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

7. Applicants amendment has overcome the rejection over Rayborn, which fails to teach or suggest the talc and copolymer beads, and Jacocks or Bindra which fail to teach the copolymer beads of the present compositions. With respect to applicants Terminal Disclaimer, such was not considered, due to lack of sufficient fees. The obviousness double patenting rejections are thus maintained until such is clarified.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

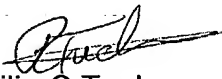

Art Unit: 1712

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
